PROFILE

Information Systems Engineer and software developer with hands-on experience building modern web products, AI-integrated applications, automation systems and real-time platforms. Strong focus on TypeScript/Next.js, backend integration, AI agents, databases, UI/UX and practical business automation. Experienced across development, testing, technical documentation, customer-facing troubleshooting and product delivery.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, C#
- **Frontend:** Next.js, React, React Native, Tailwind CSS, Material UI, responsive UI/UX, Framer Motion/Motion, i18n
- **Backend:** Node.js, Express.js, FastAPI, REST APIs, backend architecture, API integrations
- **Databases:** PostgreSQL, MySQL, Prisma ORM, Firebase
- **AI / ML:** LLM integrations, RAG, vector embeddings, Ollama, OpenAI, LangGraph, AI agents, TensorFlow/Keras
- **Automation:** n8n, chatbot workflows, bulk messaging/email automation, Telegram Bot
- **Real-Time / Web:** Socket.IO, PWA, WebSocket communication, SSR, App Router
- **DevOps / Tools:** Docker, Git, GitHub, Bitbucket, CI/CD
- **Web Quality:** Lighthouse, Technical SEO, Google Analytics, Google Search Console, SEO Content Optimization, QA
- **Integrations:** WhatsApp Business Cloud API, Coexistence, Meta integration processes, e-commerce/API integrations

PROFESSIONAL EXPERIENCE

Software Developer | Supsis AI | 04/2026 – Present | *Web, AI, automation, customer communication & product development* - supsis.com / doc.supsis.ai

- **Modern Web & UI/UX:** Developed responsive interfaces across the Supsis AI ecosystem using Next.js, React, TypeScript, Tailwind CSS and Framer Motion/Motion; improved large-scale product and marketing pages.
- **Performance & SEO:** Lighthouse-driven optimization raised measured Performance from 49 to 90 and SEO from 80 to 100, with other quality metrics reaching 92-100.

- **Documentation & Workflow:** Maintained the MkDocs/Markdown-based documentation platform, managed production builds to HTML and Javascript, and used Bitbucket, structured commits and pull requests.
- **Growth & Automation:** Produced SEO-oriented website/forum content and HTML email templates, supported bulk communication workflows, and used Google Analytics, Search Console, Opttab and Kaf Ai SEO.
- **QA & Integrations:** Participated in internal testing and case validation; created knowledge resources and documented WhatsApp Business Cloud API, Coexistence and Meta integration processes.

Staff Dog | *Live employee monitoring & productivity platform - staff-dog.com*

- **Product Architecture:** Contributed to a live employee monitoring system spanning a web platform, management/analytics dashboard and optimized desktop application.
- **Monitoring & Analytics:** Worked on real-time monitoring, automatic time tracking, application/URL activity, screen capture, keyboard/mouse activity and detailed reporting.
- **Privacy & Operations:** Refined analytics flows and supported secure, KVKK-oriented handling of employee monitoring data.

Partner & Co-Founder | Product & Full-Stack Developer | Kanzigames | Present | *Browser-based multiplayer GameHub | 4-person founding team - kanzigames.com*

- **Real-Time GameHub:** Co-founded and developed a multiplayer platform with lobbies, games, voice/text interaction and competition using Node.js, JavaScript and Socket.IO.
- **Product & QA:** Worked across game development, testing, scope definition, product direction and mobile-responsive implementation.
- **Internal Platform:** Built team chat, task management, media storage and an AI-assisted scope-generation workflow; integrated Telegram Bot and PWA notifications.

Partner & Co-Founder | Full-Stack Developer | Independent Startup Project | 01/2026 – Present | *Custom Business Automation & Enterprise Software Solutions*

- **End-to-End Delivery:** Architecting and deploying bespoke commercial web applications using Next.js, TypeScript, modern UI libraries, robust backend systems, and n8n automations.
- **AI Agents & Custom CRM:** Developing company-knowledge and appointment agents alongside custom-built CRM architectures designed from scratch for clients, providing centralized operational monitoring and management.
- **Business Delivery:** Translating client business requirements into high-performance, production-ready software solutions across the entire development lifecycle.

Software Developer Intern (Web & AI) | Conforcus Bilişim Danışmanlık | 09/2025 – 01/2026 *Web & AI product development*

- **AI Support SaaS:** Developed a Python/Ollama/vector-embedding customer-support platform with Next.js, reducing response-drafting time by approximately 80%.

- **Multi-Agent AI:** Built a financial analysis platform using LangGraph, Python and OpenAI, orchestrating five AI agents.
- **Full-Stack Systems:** Developed Next.js + Material UI dashboards, AI chatbot functionality and a TypeScript CMS with RBAC, PostgreSQL and Prisma.
- **Web Modernization:** Rebuilt a legacy website with Next.js, TypeScript, SSR and modular architecture, achieving 100/100 SEO.

ACADEMIC PROJECTS

Disaster Relief Communication System (TÜBİTAK 2209-A) | *React Native, Bluetooth Mesh, NLP*

- **Decentralized Network:** Developed an offline-first mobile application utilizing Bluetooth Mesh technology to establish a decentralized communication network, enabling data transmission without Internet or GSM.
- **AI-Driven Coordination:** Implemented an AI-driven NLP module to analyze and prioritize help requests, generated real-time density maps to coordinate rescue teams effectively, and created a web platform that enables support teams to visually monitor and manage the system through interactive heat maps.

EDUCATION B.Sc. Information Systems Engineering — Kocaeli University | Graduated
